Modules and How They Can Impact Pell Recalculations

Louisiana Association of Student Financial Aid Administrators
March 10, 2016
Today’s Session

• Five Scenarios
• All deal with determining whether the student is, in fact, subject to having his or her Pell Grant recalculated based on a change in the student’s enrollment status
• While a school sometimes discovers that a Pell recalcs is necessary when a student withdraws, this session concentrates on recalcs and NOT about withdrawals and R2T4 although we may mention it
• Slides will be shared with LASFAA for posting
• Most of you have Answer Cards of A, B and C
Pell Calculations

- Initial Pell Calculations
- Pell Recalculations
Pell Calculations vs Pell Disbursements

- Some schools choose to pay the disbursement for the payment period in installments
  - $\frac{1}{2}$ at the beginning of the payment period and $\frac{1}{2}$ when the student begins Module 2, for example
- This is not a recalcl
- Student was always the enrollment status that the student started at or had locked in
- Disbursement for that enrollment status is being paid in installments
  - School choice
  - Not an ED requirement
This student is full time even if the school chooses to divide the disbursement into two halves.

Fall Semester  Sep 1 – Dec 22

Module 1

$ 6 hours

Module 2

$ 6 hours
Initial Pell Calculations

• Document the date that you initially calculate a student’s Pell Grant

• Earliest date is the date of receipt of an ED-produced EFC*, such as on a SAR or ISIR (assuming the school has a documented or projected enrollment status for the student)

*Note: An ED-produced EFC may be an EFC from a SAR/ISIR, FAA Access, or FAFSA on the Web
Initial Pell Calculations

• If school fails to document the date of the initial calculation, you must use the later of:
  – the date that the SAR or ISIR is first received and the student’s enrollment status as of that date
  or
  – the date the student enrolls

• Your school is considered to have received the ISIR on the date it was processed. This date is labeled “Processed Date” on the ISIR
Mandatory Pell Recalculations

- Student’s enrollment status changes between payment periods
- Student’s EFC changes
- Student does not begin attendance in each class that was used to calculate that student’s enrollment status
  - Pell
  - TEACH
  - Iraq-Afghanistan Service Grant
Optional Pell Recalculations

• 690.80(b) Change in enrollment status. (2)(i) If the student's projected enrollment status changes during a payment period after the student has begun attendance in all of his or her classes for that payment period, the institution may (but is not required to) establish a policy under which the student's award for the payment period is recalculated. Any such recalculations must take into account any changes in the cost of attendance. If such a policy is established, it must apply to all students.
Optional Pell Recalculations

• The reg continues…

• (ii) If a student's projected enrollment status changes during a payment period before the student begins attendance in all of his or her classes for that payment period, the institution shall (shall means must) recalculate the student's enrollment status to reflect only those classes for which the student actually began attendance.
Optional Pell Recalculations

• Some schools choose to have no Pell recalculation policy
  – They use the initial calculation and never recalculate

• Some choose to have a policy that establishes one Pell Recalculation Date (PRD) for each payment period
  – Many schools choose the drop/add deadline or use the census date but any date is ok to use in policy
Optional Pell Recalculations

• Still others choose to have a policy that establishes multiple Pell Recalculation Dates for each payment period
  – A date is established in each module that occurs in a given payment period
  – Only one PRD is ever applicable to a given student at a time based on the latest module or term in which the student has classes
• But it will change if the student’s classes change
University of Casablanca

• UC has a standard semester term calendar with a 16 week Fall, a 16 week Spring and a 10 week Summer

• Fall and Spring both have classes that last the entire semester but both also have two 8 week modules contained within the semester, Modules 1 and 2

• UC establishes a single PRD for each payment period which is the 12th day of each payment period

• UC will not recalculate a student’s Pell Grant, up or down, when enrollment changes after that date

- No written confirmation = withdrawn student

Fall Semester Sep 1 – Dec 22

Module 2
Scenario 1 - Rick

• If he is a withdrawn student we
  • First recalculate Pell because he never began attendance in Module 2
  • Second, calculate an R2T4 using the recalculated Pell amount
